

Exploring 4-H at Home

Sustainable Agriculture
and Food Security

Pillar: Sustainable Agriculture and Food Security

Activity: Virtual Farm Tour and at home tour challenge

Farm and Food Care Ontario- FarmFood 360
farmfood360.ca

Challenge #1

1. Go to the website www.farmfood360.ca .
2. Choose a farm to virtually tour.
3. Learn about how other farmers run their operation!

Follow up Questions

1. What farm(s) did you visit?
2. What is one thing you learned from watching the virtual farm tour?
3. Is there anything that is similar to your own farm operation (*if applicable*)?
4. Is there anything you would ask the farmer about their operations?
5. How will you share what you learned today?

Challenge #2

At Home Farm Tour

We would love to see a day in the life of our 4-H members, and get a tour of your farm operations. It's easy to get started! Either film a video or take a picture tour of your farm! Here are some ideas on what to show during your tour:

- Introduce yourself
 - State your name, club, and project
- Your facility (your barn, pens, etc.)
- Your 4-H project animal(s)
 - Why you chose your project animals
 - Where did you get your animals?
- Your feed
 - How much do you feed?
 - What do you feed?
- Your show supplies
- Something interesting about your farm!
- Anything else that you think people would like to learn about your project and/or farm

Keep your video under five minutes! Once you have completed your video or picture tour, share it on the Exploring 4-H at Home Facebook page, and share it with your club. This is a great way to stay connected with your fellow 4-H members.

Happy touring!
